

# SDD-U

## Dehumidifying Dryer

**Stainless steel**  
all working surfaces are water and other substances resistant

**Inspection door**  
gives a possibility to fast clean main hopper

**Shut-off plate**  
as a standard

**Caster wheels**  
ensures an easy setup of device

**Insulated hopper and hose**  
ensures a low energy consumption

**Advanced PID Controller**  
gives a possibility to set up drying time for each day

**Dew point monitor**  
gives a possibility to check current dew point of drying air (optional)

**Molecular sieve**  
low and constant dew point temperature to -40° C

**Measurement point**  
gives a possibility to fast measure of current dew point by using portable dew point device (optional)
