

SGB

Gravimetric doser

SHINI EUROPE

Loading system
The PLC controls central material receivers SHR-U-S and main blower SVG

B&R PLC
is taking care about precision of all dosing function

Wide range
up to 8 ingredients will fill difficult requirements

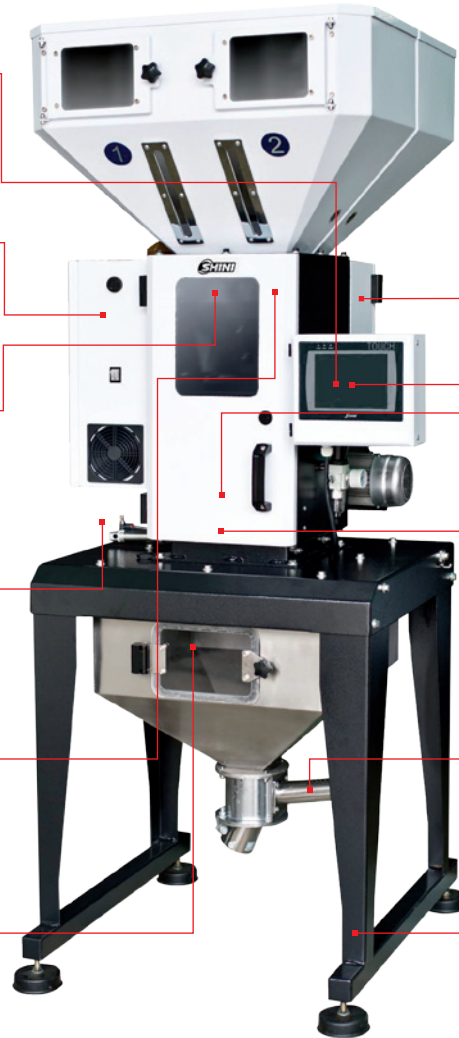

Air blow gun
gives a possibility to fast clean of device after production is finished

Beam load cells
high sensitive sensor ensure a very high measurement precision

IFM Capacitive sensors
effective sensors ensure still operation

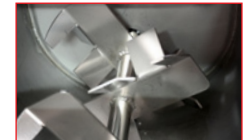

FESTO solenoids
reliable in all difficult conditions

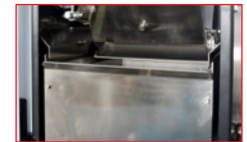

Colorful touch HMI display
ensures an user friendly operation

Mixing screw
ensures proper mixing of material

Stainless steel
all work surfaces are water and other substances resistant

Suction box
with double or single vacuum point, ensures an easy material distribution (optional)

Mobile stand
with material storage ensures a comfortable machine usage and instalation (optional)
