

STM-WF

Mould Temperature Controller with Large Flow

SHINI EUROPE

Hanyoung Nux brand controller

adopts easy operation, overload protection with faults reporting. Additional RTU Module ensures remote control of STM, e.g. with PC or IMM

New „large flow” pump, CNP brand

adopts large flow pump with stable performances and proper pressure

Low and high pressure sensor

ensures proper working of the device

Spring (loaded) safety valve

starts up when pressure is too high

Temperature control system

ensures overheat protection
