SGB Gravimetric doser

Loading system

The PLC controls central material receivers SHR-U-S and main blower SVG

B&R PLC

is taking care about precision of all dosing function

Wide range

up to 8 ingredients will fill difficult requirements

1

gives a possibility to fast clean

Air blow gun

of device after production is finished

Beam load cells

high sensitive sensor ensure a very high measurement precision

Stainless steel

all work surfaces are water

and other substances resistant

with double or single vacuum point, ensures an easy material distribution (optional)

Mobile stand with material storage

ensures a comfortable machine ussage and instalation (optional)

IFM Capacitive sensors

effective sensors ensure still operation
